

GENOA FOOTHILL TRAIL PROJECT

Continued from page 5

Genoa Canyons in the Genoa area. Most of the trail system will be built with a small dozer and mini-excavator. The anticipated completion and opening date for the trail is spring, 2012. CVTA is seeking volunteers to assist with trail building. No previous experience is needed.

The Genoa Loop Trail, which is approximately 8 miles long, will provide a moderate 3 to 4 hour hiking experience with spectacular views of the Carson Valley and Pine Nut Mountains. Climbing about 1000 feet

above Genoa, this loop will lead to Genoa and Sierra Canyons. The lower 1.25 miles of the loop will follow Jacks Valley Road and connecting streets in Genoa. The Sierra Canyon Trail will travel up the north side of Sierra Canyon and connect to the Tahoe Rim Trail west of Genoa Peak. This 7-mile trail will offer extraordinary views, climbing 3500 feet through chaparral, mahogany and

Jeffrey pine.

Funding for the Genoa Foothill Trail Project has been provided by ongoing fundraising, numerous volunteer donations and a Nevada Division of State Lands Question 1 Grant. CVTA, Douglas County and the U.S. Forest Service have developed this project to provide trail opportunities in the Carson Valley consistent with the Douglas County Comprehensive Trails Plan (2003).
